Re: Application No. 2008-0275 (S) –Preliminary Plan Submission for Barley Mill Plaza

Dear Mr. Lober:

The Division of Public Health Office of Engineering received the revised preliminary plan for Barley Mill Plaza. The preliminary application indicates that the City of Wilmington will supply water.

This project requires the owner to obtain an Approval to Construct and an Approval to Operate from the Office of Engineering when constructing a new water system or altering an existing water system.

In order to obtain an Approval to Construct, plans and specifications must be prepared by a registered Delaware professional engineer. Plans for the system, including water mains or extensions thereto, storage facilities, treatment works, and all related appurtenances, must be approved by the Office of Engineering prior to construction. Please refer to *Construction Plans and Specifications Submittal and Review Guidelines* prepared by the Office of Engineering for further details.

It is the owner's responsibility to ensure as-built drawings are maintained throughout all phases of construction. Prior to the owner receiving an Approval to Operate for this project, the Office of Engineering requires one set of as-built drawings, including profile markups, for all plans approved for construction. An Approval to Operate will be issued after all applicable requirements are met.

Please contact Doug Lodge, P.E., or me at (302) 741-8646 for further information.

Sincerely,

William J. Milliken, Jr.

Engineer III
Office of Engineering
